STANDARD: Written policy, procedure and practice require Community Supervision Agencies to have a written statement of purpose, clearly stated goals, and measurable objectives regarding the use of surveillance when applicable.

DISCUSSION: Surveillance positions can be used to enhance an agency's ability to monitor the whereabouts and activities of juveniles placed under supervision of the Community Supervision Agency. When used appropriately, surveillance can assist an agency in achieving its goal of contributing to public safety and promoting juvenile accountability within the community setting. The extent to which surveillance is used may depend on juvenile characteristics, the agency's mission, the availability of resources, and whether public safety would be compromised if surveillance were not provided.

NOTE: The standards and procedures set forth herein are intended to establish operational guidelines for community supervision agencies and their employees/contractors and juveniles under supervision. They are not intended to establish state created liberty interests for community supervision agencies or their employees/contractors, or supervised juveniles, or an independent duty owed by the Juvenile Justice Authority to community supervision agencies, or their employees/contractors, supervised juveniles or third parties. This standard and procedure is not intended to establish or create new constitutional rights or to enlarge or expand upon existing constitutional rights or duties.
